

## On April 22, 2011 we prayed for Heidi

=====

Heidi is in the hospital with some kind of blood disorder and she can hardly get enough oxygen to breath. They won't even let her talk as it robs the oxygen that she needs for life.

Please claim healing for this strange occurrence and bind Satan and cast him out of her body and life and ask God to lead her into salvation so that both her and her husband can testify of Gods Grace and healing power in their lives.

=====

**PRAISE THE LORD** - they sent her home on the weekend for a trial and she as of today she's still home, her breathing is good and she says she feels great.

\*\*\*\*\*

**JUNE 2011** - A couple months later they found a tumor in her stomach that was cancerous, so we again prayed that the cancer **would dry up and disappear** and leave her body totally. The hospital had bed problems so she wasn't admitted, last week they realized that the tumor was shrunk so they sent her to the Red Deer Hospital for them to draw off some fluid for further tests. **YOU GUESSED IT !!** there was no fluid and the tumor is just a dry shell.

She does now acknowledge it is Jesus that has intervened in her life.

As her and her husband Stan are NEW believers, please continue to claim Gods peace and teaching will be with them

=====

## **JAN 12/2012**

**THE POWER OF PRAYER** - for those that do not believe God loves ALL of us and answers our sincere and fervent prayer for others, those that believe Jesus and those that DO NOT believe.

Heidi is an example of Gods love, She went back to the Drs for **medical proof** that this tumor was in actuality dried up as the saints prayed for. They did an ultra sound and cat scan in Dec 2011 and all they could find **was a tiny dried up speck**. You

Can Not Tell Heidi That It Wasn't God That Answered Prayer.

**This WAS** the dreaded Cancer **WORD** that **MOST** people are so afraid of.

**PRAISE GOD**, Heidi was not only healed, **but both her and her husbands name is written down in the Lambs Book of Life!**
